

Project 2

Swiss Army Knife Network Sniffer

Course of study

Bachelor of Science in Computer Science

Author

Frank Gauss (gausf1) and Lukas von Allmen (vonal3)

Advisor

Wenger Hansjürg

Version 1.0 of September 19, 2025

Abstract

One-paragraph summary of the entire study – typically no more than 250 words in length (and in many cases it is well shorter than that), the Abstract provides an overview of the study.

Contents

Abstract	iii
1 First Thesis Chapter	1
1.1 Introduction	1
1.2 Specification	1
1.2.1 System Delimitation	1
1.3 Evaluation	1
1.3.1 Criteria	1
2 Second Thesis Chapter	3
2.1 Implementation	3
2.1.1 Architecture	3
Bibliography	7
List of Figures	9
List of Tables	11
Listings	13
Glossary	15
.1 First Appendix Chapter	16
.1.1 Project 2 Proposal	16

1 First Thesis Chapter

1.1 Introduction

What is the topic and why is it worth studying? – the first major section of text in the paper, the Introduction commonly describes the topic under investigation, summarizes or discusses relevant prior research (for related details, please see the Writing Literature Reviews section of this website), identifies unresolved issues that the current research will address, and provides an overview of the research that is to be described in greater detail in the sections to follow.

1.2 Specification

1.2.1 System Delimitation

System Environment

1.3 Evaluation

1.3.1 Criteria

2 Second Thesis Chapter

2.1 Implementation

2.1.1 Architecture

Declaration of Authorship

I hereby declare that I have written this thesis independently and have not used any sources or aids other than those acknowledged.

All statements taken from other writings, either literally or in essence, have been marked as such.

I hereby agree that the present work may be reviewed in electronic form using appropriate software.

Glossary

This document is incomplete. The external file associated with the glossary ‘main’ (which should be called `documentation.gls`) hasn’t been created.

Check the contents of the file `documentation.glo`. If it’s empty, that means you haven’t indexed any of your entries in this glossary (using commands like `\gls` or `\glsadd`) so this list can’t be generated. If the file isn’t empty, the document build process hasn’t been completed.

If you don’t want this glossary, add `nomain` to your package option list when you load `glossaries-extra.sty`. For example:

```
\usepackage[nomain]{glossaries-extra}
```

Try one of the following:

- ▶ Add `automake` to your package option list when you load `glossaries-extra.sty`.
For example:

```
\usepackage[automake]{glossaries-extra}
```

- ▶ Run the external (Lua) application:

```
makeglossaries-lite.lua "documentation"
```

- ▶ Run the external (Perl) application:

```
makeglossaries "documentation"
```

Then rerun L^AT_EX on this document.

This message will be removed once the problem has been fixed.
