

Bachelor Thesis

Nsak as Framework for Scenario Based Network Security

Course of study	Bachelor of Science in Computer Science
Author	Frank Gauss (gausf1) and Lukas von Allmen (vonal3)
Advisor	Wenger Hansjürg

Version 1.0 of February 23, 2026

Abstract

One-paragraph summary of the entire study – typically no more than 250 words in length (and in many cases it is well shorter than that), the Abstract provides an overview of the study.

Contents

Abstract	ii
1. Introduction	1

Glossary

This document is incomplete. The external file associated with the glossary ‘main’ (which should be called `bachelor-thesis.gls`) hasn’t been created.

Check the contents of the file `bachelor-thesis.gls`. If it’s empty, that means you haven’t indexed any of your entries in this glossary (using commands like `\gls` or `\glsadd`) so this list can’t be generated. If the file isn’t empty, the document build process hasn’t been completed.

If you don’t want this glossary, add `nomain` to your package option list when you load `glossaries-extra.sty`. For example:

```
\usepackage[nomain]{glossaries-extra}
```

Try one of the following:

- ▶ Add `automake` to your package option list when you load `glossaries-extra.sty`. For example:

```
\usepackage[automake]{glossaries-extra}
```

- ▶ Run the external (Lua) application:

```
makeglossaries-lite.lua "bachelor-thesis"
```

- ▶ Run the external (Perl) application:

```
makeglossaries "bachelor-thesis"
```

Then rerun $\text{\LaTeX}$ on this document.

This message will be removed once the problem has been fixed.
